Artificial Intelligence Developer

Machine Learning | NLP | Data Science | Computer Vision | AI Development | Statistics | Cloud Computing | IoT

Professional Profile

Artificial Intelligence professional with hands-on experience in machine learning, natural language processing, computer vision, and embedded AI systems. I have applied genetic algorithms, LLMs, and regression models to real-world problems such as route optimization, price prediction, and health diagnostics. I specialize in designing scalable AI solutions and high-performance embedded systems for real-time operational applications.

Professional Experience

Strategy & Business Operations Technician – Baxter International Inc. , Dominican Republic	Sep 2025 – Present
- Develop and implement Artificial Intelligence and Computer Vision solutions to optimize key business operations and drive process innovation. - Engineer and integrate embedded systems with AI models, focusing on creating scalable, high-performance applications for real-time operational use. - Analyze operational data to identify opportunities for technological improvement, contributing to the strategic direction of the department.	

Health Data Intelligence Intern – Grupo Humano , Dominican Republic	May 2025 – Jul 2025
- Implemented unsupervised clustering models to segment medical claims and patient data, effectively identifying anomalies and patterns indicative of potential fraud. - Built automated ETL pipelines and developed interactive dashboards to monitor Key Performance Indicators (KPIs) related to medical costs and fraud alerts. - Leveraged data insights to reveal opportunities for the creation of new, targeted health plans aimed at specific patient profiles.	

Skills

Technical Skills

Soft Skills

- Languages:** Python, C++, SQL
- Machine Learning:** Scikit-learn, Pandas, Matplotlib, OpenCV, NLTK, Spacy, LLMs, Transformers, Fine-Tuning
- Data Engineering & DBs:** ETL, Data Cleaning, Web Scraping (Scrapy, Selenium), MySQL, SQL Server
- Cloud & MLOps:** Microsoft Azure, Docker
- Developer Tools & BI:** Git, Power BI, HTML, CSS, Microsoft Office

- Problem-solving
- Critical Thinking
- Teamwork
- Effective Communication
- Adaptability
- Time Management
- Continuous Learning
- Attention to Detail

Featured Projects

RAG-based Conversational AI Agent

Conversational AI agent based on RAG, packaged in Docker and deployed to receive POST requests. [GitHub](#)

Genetic Shopping (Team Project)

Genetic algorithms to optimize supermarket purchases, reducing costs compared to greedy and brute-force methods. [GitHub](#)

LLM Evaluation

Benchmarked NLP models (summarization, classification, translation, generation) using ROUGE, BLEU, accuracy, and perplexity. [GitHub](#)

Dog Breed Identification (Kaggle Challenge)

Multiclass image classification (120 breeds) with TensorFlow & MobileNetV2. Preprocessing, callbacks & deployment-ready model. [GitHub](#)

Heart Disease Classification

Model trained with SVM, Random Forest, and KNN validated through AUC and confusion matrix. Used SMOTE and parameter tuning. [GitHub](#)

Sentiment Analysis

Eight-emotion classification on movie reviews using tokenization, lemmatization, and POS tagging. [GitHub](#)

Achievements Recognition

- Second Place – ITLA Science Fair 2025**
Recognized alongside my teammates in a scientific tech fair for developing *SafeVision*, an AI-powered system designed for child visual protection and automated moderation of multimedia and textual content.

Languages

- English: Advanced

Education

Instituto Tecnológico de Las Américas (ITLA)

Associate’s Degree in Artificial Intelligence

Expected: Dec 2025

Certifications & Relevant Courses

- Azure AI Fundamentals AI-900** – Microsoft [View Certificate](#)
- Azure Fundamentals AZ-900** – Microsoft [View Certificate](#)
- Python Data Associate** – DataCamp (Jan 2025) [View Certificate](#)
- The Complete AI & Data Science Bootcamp** – (Sep 2025) [View Certificate](#)
- CPA: Programming Essentials in C++** – Cisco (Dec 2023) [View Certificate](#)
- English Immersion for Competitiveness** – MESCYT (Dec 2023) [View Certificate](#)
- IT Essentials** – Cisco (Oct 2023) [View Certificate](#)
